

Israel Quinonez
Project 2

Milestone 1

For project 2 I will try to redo my project 1 with a few changes. Im going to simplify the app and only have 3 main fragments. One will be the main search feature, then one for the results in a list view and finally the detail page that will show me the details of what was selected in the list view. I wont be including the restaurants tab that I did on the ios version to try to make the app easier and simpler. Everything else for milestone 1 is the same as the other milestone 1 except these changes.
